

# WINBID2000

## Advanced Estimating for Heavy Highway Construction

### WINBID 495 new features: Results Analysis

This is an entirely new function that shows all of the Bids in the current Bid Folder, with filtering and sorting to allow you to adjust the view as desired. You can filter by Estimator and by Customer, for any range of dates, and view by four different sort-orders.

You find this new function at the lower right corner of the WINBID2000 Main Screen.

The screen always shows you the overall totals (Cost, Markup, Price) for the selected set of Bids. Also, you can view or print a report that subtotals by Estimator or Customer, if you want to compare the results that way.

The Results Analysis screen also lets you track Won-Lost-Pending status of the Bids. The reports show the total amounts of Won-Lost-Pending separately.

This screen also has an UPLOAD button for each Bid that directly sends that Bid's information to Accounting. This is in addition to the previous option of converting to a Budget and then sending that information over to Accounting (the previous method is preferable if you wish to keep an unchanged copy of the Bid as it was originally submitted).

Won	Lost	Pending	Bid Name	Bid Date	Estimator	BidCost	Mar%	Margin\$	BidPrice
