

WinBid2000 Changes for Version 4.90

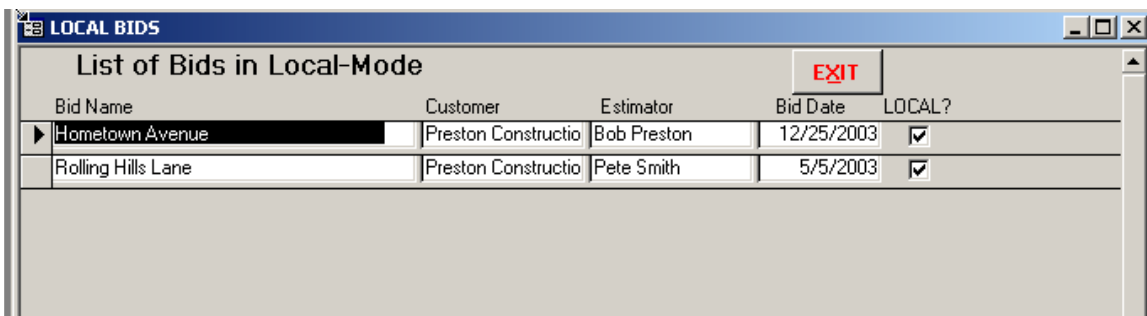

Version 4.90 has two or three major changes and several smaller changes and numerous repairs and improvements. Virtually every screen and report is changed in one way or another. Most changes were to the invisible programs that make the program run, but many of the screens have changes that you will easily notice, including larger fonts and better spacing.

Main screen lists the last eight bids opened by the user.

All major bid functions can be reached with a single click.

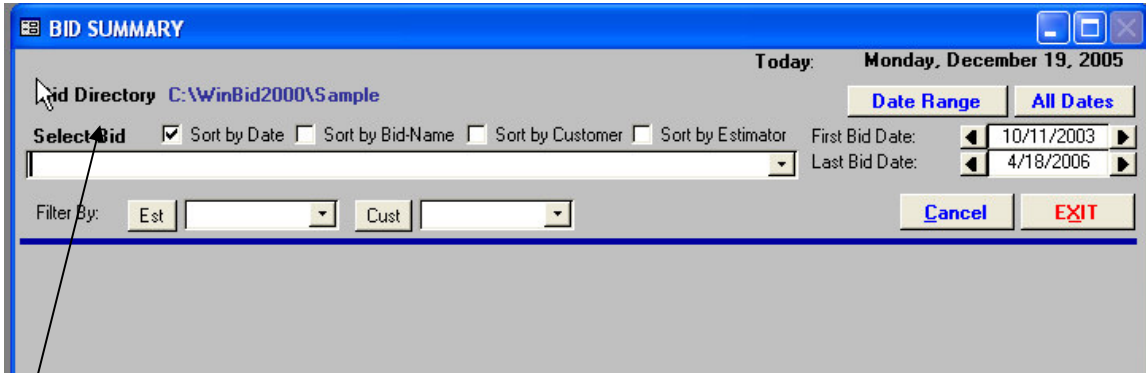

Local Mode allows the user to place the bid on his local hard drive and work on it there. The system keeps track of its location and upon closing the bid the file is returned to the hard drive at the same location as it was loaded from. The “?” button allows you to see which bids are currently being worked on in Local Mode – and thus locked on the network until returned by that Estimator.

If the “?” button is pressed this is the screen you get. It shows you which bids, if any, are being worked on in LOCAL MODE (and thus are locked on the network until the LOCAL work is finished).

WinBid2000 Changes for Version 4.90

Bid Summary

Notice you can now select bids in many different ways. Some users change the name to reflect job numbers or other changes then like to sort by "Name". In other cases you may want to sort by estimator or customer.

Sch	Item Code	Descriptions	Quant	UofM	Unit Price	Total Price	EXIT

WinBid2000 Changes for Version 4.90

Many other changes have been added through the program but the ones shown above are the main screen changes. In addition the following changes have been made.

1. Importing, Exporting and Copy-Bid functions are easier and more reliable
2. On the opening screen Ctrl-F1 opens up a diagnostic system that has been added to help troubleshoot when being aided by PCS support.
3. Item recalculation has been rewritten to recalc at all levels after each change
4. Reorder of child items is now allowed at all levels.
5. All “pull down” look up boxes have been increased in size and enlarged for viewing larger fields and longer lists.
6. Cleaned up many reports
7. Added “All Vendors in Bid”

The screenshot shows the 'SUBS/VENDORS/CUSTOMERS' window. At the top, there is a 'Selection:' dropdown menu set to 'Paving & Materials', an 'Order By:' section with radio buttons for 'Name' (selected) and 'ID', and buttons for 'New Record', 'Delete Record', 'Cancel', and 'EXIT'. Below this is a section with radio buttons for 'Vendors', 'SubContractors', 'Customers', and 'All' (selected). The main form contains fields for 'Company Name' (Paving & Materials), 'Address' (999 Asphalt road), 'City' (Los Angeles), 'State' (CA), 'Zip' (99999), 'Phone' (999-888-0000), 'Fax' (999-777-0000), 'Contact Name', 'License' (888888), 'Minority', 'Percent Minority', 'Minority Cert', and 'ID Code' (pav001). There are checkboxes for 'Vendor' (checked), 'Subcontractor' (checked), and 'Customer' (unchecked). At the bottom, there are two sections: 'Vendor Material Categories' with a dropdown and a 'Delete Cat' button, and 'Subcontractor Categories' with a list of categories (SGRD, SPAV, SPLA, etc.) and a 'Delete Cat' button.

8. Group by vendor, sub or customer or show all on form above.
9. Improved setup for pay zones in labor detail.

WinBid2000 Changes for Version 4.90

10. Item Description field has been increased to 255 characters and can be passed to the quote program at that length.

11. The copy item and copy activity are now the same screen. Even though both menu options still appear for user consistency they both do the same thing. This form has been rewritten for smoother operation on different bid folders.
